# Axway Amplify Open Banking

## Create customer experiences that make you more competitive

Amplify Open Banking empowers financial institutions to seamlessly share data, ensure robust security, and meet regulatory compliance demands, while enhancing customer trust and unlocking new revenue opportunities. With Amplify Open Banking, open banking isn't just about compliance – it's about securely enabling innovation and offering customer experiences that stimulate business growth.

### All the open banking components to help you succeed

Amplify Open Banking serves as an entry point for financial institutions looking to implement and optimize their open banking and open finance ecosystem. It offers:

- An intuitive developer experience with seamless third-party onboarding and management
- Prebuilt open banking (FDX) APIs with robust security flows and continuous updates to keep up with evolving regulation and market needs
- A scalable consent management module, future-enabling financial institutions to ensure security as their open finance strategies and objectives change
- A streamlined integration experience, featuring a low-code/no-code environment and a wide range of predefined connectors to effortlessly link with back-end systems
